Futuradue HP

High Power Wall-Mounted Condensing Boiler in Cascade

Made in Italy

A

High efficiency boiler with the possibility of multi-unit connection (Cascade System)*

- Maximum flexibility and reliability. Features a **wide range of power up to 690kW** from 34 kW to 115 kW (per unit)
- **Combination of up to 6 wall-mounted units** for indoor or outdoor installation
- Significant energy savings, combined with low emissions of NOx5 class
- Power Adjustment 1:8
- High efficiency stainless steel condensing exchanger from, resistant to pressure **up to 6 bar**
- User-friendly control panel with LCD screen for easy use, also displaying system failure history
- Ability to install outdoor sensor to use compensation, adjusting the inverting temperature to external climatic conditions
- Easy entry and moving to pre-existing main installation, even on high floors

* ★★★★★ as per 92/42/EEC European directive, for central heating.
